

HALIO™

SMART-TINTING GLASS

INTERIOR WALLS & PARTITIONS

CONFIDENTIAL SPACES IN SECONDS

Halio begins tinting within 15 seconds to create confidential spaces, achieving its darkest tint within 3 minutes. Shades in between clear and dark take even less time. With the right design elements, Halio glass walls can even deliver acoustic privacy.

VARIABLE TINTS FOR BEAUTIFUL INTERIORS

In its clear state, Halio is indistinguishable from conventional glass. It disperses natural light and allows views to the outdoors, no matter where someone is seated. With all that natural light, the need for artificial lighting is dramatically reduced. And when there's too much sun, Halio tints to provide shade and reduce glare without using blinds or curtains.

MODERN STYLE, CLASSIC COLOR

Glass never goes out of style, and Halio features neutral tints of classic grays so that your workplace will look current and modern for a very long time. Because you can control each individual panel, you can also use Halio to create a mood or to add visual interest to a space.

SLEEK, INTUITIVE CONTROLS

Halio can be controlled with sleek, wall-mounted controls, voice commands, or an app for your phone or tablet.

**HALIO PANELS CAN
BE CONTROLLED
INDEPENDENTLY
TO CREATE VISUAL
INTEREST.**

**Halio blocks up to
99.9% of visible light to
create private spaces.**

Create open and flexible spaces with Halio smart-tinting glass. Halio creates beautiful, transparent partitions and walls that promote collaboration and improve communication while delivering privacy on demand. Halio walls convey honesty, openness, and respect for employees' need for privacy - all at the same time.

Halio brightens spaces while delivering aesthetic and functional benefits. In its clear and tinted states, Halio complements both contemporary and classical design styles.

With Halio, you'll have the most technologically advanced smart-tinting glass available. It's innovative, sustainable, and it works beautifully with your favorite color palette.

Imagine the possibilities.

1. PRECISION CONTROL

Each Halio panel can be controlled independently so you can tint one or all the panels.

2. PRIVACY ON COMMAND

Control the tinting and clearing with your voice, a tap on an app, or the press of a switch. Or you can automate the process - programming Halio to tint on schedule.

3. ADVANCED TECHNOLOGY

Halio responds within 15 seconds to deliver the tint level you desire - any shade between clear and dark. And when it's clear, it looks just like ordinary glass.

Exclusively from Halio

Created to be the exclusive provider of Halio products and services to the building industry, Halio is a joint venture between AGC, the world's largest flat glass manufacturer and Kinestral Technologies, Inc., developer and manufacturer of Halio smart-tinting technologies. The joint venture is comprised of two entities - Halio North America and Halio International. The partnership leverages the partners' respective strengths and knowledge: AGC's reputation in the building industry and 100+ years of experience in glass technologies and Kinestral's innovative, patented smart-tinting technologies.
